

Skype for business

Skype for business integration - all switchboard functions directly via Skype

Receive calls on your public telephone number and call via Soluno's switchboard with Skype for the business application.

Access to all switchboard functions

If you choose to integrate Skype with us you gain access to all our switchboard functions, referral system and many other services.

Integrate your mobile telephony regardless of operator

When a call is received to your fixed telephone number, it simultaneously goes to both your Skype application and your mobile telephone. We provide this independent of mobile operator, any onward connection fees are covered by us.

Full mobile integration with Soluno Mobile subscription

With a mobile subscription from Soluno we can ensure it rings both in your Skype application and on your mobile telephone with incoming calls to both your fixed number and mobile number.

Integrated referral and line status

If you set your status as busy in your Skype application, you also turn off your connection in the switchboard and people who call are informed that you are busy. When you are talking on the phone, both in the application and on your mobile, your colleagues see that you are busy on the phone.

What technical prerequisites are required?

Own Skype server with the right licences from Microsoft.
